Skills

Languages: Java

Framework: Spring, Spring Boot

Areas of Interest: Backend development, Android development etc.

Experience

Deutsche Bank/ Analyst

July 2018 - PRESENT, PUNE

Currently working in the Transaction surveillance department of the Bank. Following are some of the works that I've completed as part of my role in the department:-

· Worked with the Business Analyst on my first project- getting the requirements from the business and translated them to technical requirements for the project.
· Worked as part of the development in creating common interface applications (Java-Spring Boot) between payment applications and transaction surveillance applications.
· Worked on a BDD-cucumber-selenium based UI Automation application which will save a lot of manual work done by the Operations team everyday.
· Worked on creating spring web application for IBM RIT replacement with thymeleaf as user interface.
